## Aspen Medical Awarded GSA Logistics Support Services

SIN	GSA AWARDED SERVICES	CONTRACTOR OR CUSTOMER SITE	DOMESTIC OR OVERSEAS	UNIT OF ISSUE	FINAL PRICE OFFERED TO GSA (including IFF)
<b>Aspen Medical Logistics Support Services</b>					
874-504 and 874-507	<p>Large Clinic Deployment Logistics Management &amp; Support Services: Service encompasses Deployment Logistics and Operations &amp; Management Logistics necessary to sustain a comprehensive practice with urgent care capability supporting up to 4,000 people. This includes the provision and dispensing (transportation, warehousing, inventory, material handling, packaging, placement and installation, maintenance and repair) of equipment and personnel. These services encompass planning and execution of logistics and support services associated with the assigned program to include labor, tool, commodity, component, transportation, and facility requirements.</p> <p>Please see attached services description for a comprehensive services overview.</p>	Both	Both	Day	\$1,885.46

SCA Eligible Contract Labor Category	SCA Equivalent Code – Title	WD Number
Engineering Technician	Engineering Technician I	2005-2521
Administrative Assistant	Administrative Assistant	2005-2521
Supply Technician	Supply Technician	2005-2521
Shipping/Receiving Clerk	Shipping/Receiving Clerk	2005-2521

The Service Contract Act (SCA) is applicable to this contract and it includes SCA applicable labor categories. The prices for the cited SCA labor categories are based on the U.S. Department of Labor Wage Determination Number(s) identified in the SCA matrix and above. The prices offered are based on the preponderance of where work is performed and should the contractor perform in an area with lower SCA rates, resulting in lower wages being paid, the task order prices will be discounted accordingly.

## **LARGE CLINIC LOGISTICS MANAGEMENT & SUPPORT SERVICES**

Service encompasses Deployment Logistics and Operations & Management Logistics necessary to sustain a comprehensive practice with urgent care capability supporting up to 4,000 people. This includes the provision and dispensing (transportation, warehousing, inventory, material handling, packaging, placement and installation, maintenance and repair) of equipment and personnel. These services encompass planning and execution of logistics and support services associated with the assigned program to include labor, tool, commodity, component, transportation, and facility requirements.

A proficient healthcare operation entails the sophisticated development of logistics support systems, integrated facility management and operations management support. This service is designed to provide the customer with the needed logistics management resources and expertise in order to meet their material supply and health care clinic deployment requirements in a timely, efficient, and cost effective manner. These services employ the latest concepts and methods in material and property requirements planning, procurement, movement, storage, and accountability systems, allowing the customer to focus on the healthcare operation while leaving logistics management to the Aspen team. Our professionals focus on working with our clients to predict future material & personnel demand and the design & implementation of a customized distribution and deployment network that allows for immediate and "first response" support. To support project deployment needs, our logistics professionals employ proprietary tools and "what works" methodologies:

- Deployment operation requirements analysis prior to committing resources
- Establishing material requirements, procurement, transportation, storage, and performing activities to keep account of all resources and maintain control of logistics network configurations
- Design and implementation of operational plan
- Identification of local, national and global distribution resources/capabilities, and incorporation into support plan
- Outlining procedures to enable operational plan and acquisition of required resources
- Development of modeling scenarios to demonstrate the deployment plan results and effectiveness
- Assessing alternate deployment strategies
- Analyzing and developing contingency plans to deploy resources and assess potential bottlenecks, available resources, and operating procedures
- Development of necessary communications and information management systems to monitor and validate deployment
- Utilization and integration of public and private sector resources to support progress
- Inventory management (emergency unit storage and restocking management)
- Ongoing evaluation of deployment for quality assurance, minimizing operating costs and procedural calibration

Additionally, our logistics professionals provide full turnkey operations support for the overall program. This includes the maintenance and support services, the O&M of systems and components, and technology refreshes to improve system and logistics performance. The service covers all tools and procedures necessary to plan, design, implement, manage, operate and maintain those logistic system and computerized supply control operations.

Below is a listing of the core logistics operations completed by our team in support of operations globally:

- Equipment Logistics: all stores and material to support health services and management of equipment and cold chain.
- Equipment Transportation, inventory, and material inspections;
- Equipment Warehousing: Delivery of equipment via local warehouses if necessary;
- Equipment Installation: Assembly and installment of healthcare equipment;
- Relocation of Equipment and Removal of Obsolete Equipment;
- Maintenance and repair of Equipment: scheduled maintenance, calibration and repair of Equipment
- Laboratory material logistics: Management of laboratory shipment, and/or sample collection
- All the logistics, storage and supply chain support. Aspen places orders and ensures material required is available 100% of the time. This includes order management, storage management and handling stock management
- All furnishings, office and general equipment required to undertake the services including the maintenance and repair of that furniture and equipment.
- Flying specialist technicians to the site on an annual basis, if necessary.
